Introducing
Skin
REJUVINATION:**

**Get rid of your age
spots, sun damage,
rosacea, varicose
and spider veins!**

VARICOSE VEINS AND SPIDER VEINS

\$150 per 15 minute session

How It Works

During treatment, light penetrates the skin and is absorbed by the blood. Delays between the pulses allow for sufficient cooling of the epidermis and thermal relaxation of the vessel.

Immediately after treatment, the temperature within the treated blood vessel has been raised sufficiently for it to collapse and break down with virtually no purpura effect.

After treatment and over time, the blood vessel disappears almost completely.

Leg Veins

Before and 3 months after 3 IPL and 2 laser treatments over 5 days

Leg Veins

Before and 3 months after 4 IPL treatments

Poikiloderma

Before and 4 months after IPL treatments

Broken Capillaries

Before and 3 months after 3 IPL treatments

Sun Damage

Before and 2 months post 4 IPL treatments

Age Spots

Before and 3 months after 2 IPL treatments

Hands	\$150	\$750
Forearms	\$400	\$2,000
Full Arms	\$650	\$3,250
One Spot+additional spots	\$50+\$10	

How It Works

A broad spectrum of light is transmitted through a small, smooth, transparent handpiece which is gently placed over the skin. Cut-off filters in the handpiece change the wavelength range allowing it to be optimized for different applications and skin types. The light penetrates the tissue and is absorbed by either the blood when treating vascular lesions or the melanin when treating pigmented lesions damaging them. The body's natural processes then remove the injured tissue giving the skin a more even and youthful appearance.
